STATIC DISSIPATIVE TOP FIT GLOVES

The Static Dissipative Top Fit Gloves are made of 20% Carbon Yarn and 80% Nylon. It's coated with polyurethane at the finger tips. Nylon gloves are known to have good elasticity. Its characteristics are non-slip due to the grip provided by the coating, good ventilation and sweat preventive. The gloves will fit perfectly with your hands and it will protect your skin. These gloves are washable thus reusable and will not shrink, stiffen or lose its grip.

RECOMMENDED APPLICATIONS:

- Applicable for processes where good grip to parts is required.
- Applicable also for less ESD sensitive processes to avoid product failure.
- Applicable for PCBA handling and other electronic devices.

PRODUCT DESCRIPTION:

Materials	: 20% Carbon Yarn, 80% Nylon, Polyurethane coated at finger tips
Applications	: Electronics and Semiconductor Assembly industry Disk-Drive Industry Automotive Industry Painting Industry
Total Length (mm)	: 210±5 (Small), 220±5 (Medium), 228±5 (Large)
Thickness (mm)	: 1.00±0.1
Surface Resistivity	: 109 +/-1 ohm/square
